

# Kaltura CaptureSpace and MediaSpace

Morgan Witte

A large, dark blue, diagonal shape that starts from the bottom left and extends towards the top right, covering the lower half of the slide.

# Why Two Names?

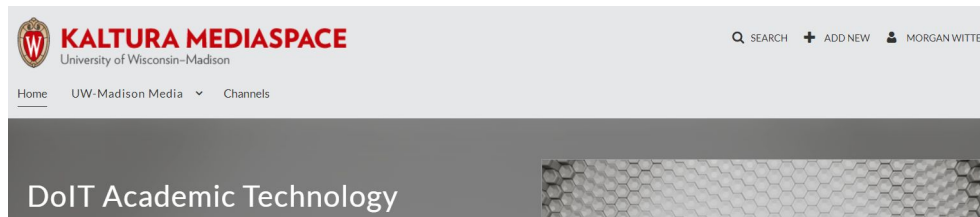

## CaptureSpace

- Desktop software, launched via MediaSpace
- Used to record and edit content

## MediaSpace (mediaspace.wisc.edu)

- Cloud-based video storage and viewing
- Launch CaptureSpace from here to ensure you're using the correct account
- Add closed captioning after uploading videos from CaptureSpace

# Does It Work?

## Pros

- Record audio, webcam/video, and screen capture simultaneously
- Simple, intuitive, and streamlined process
- Can integrate interactive quiz-style questions in the middle of the videos
- Create Channels for related content
- Integrates with Canvas seamlessly

## Cons

- Minimal editing capabilities
- Editing can be frustrating with short videos > can only trim by full seconds
- Need to upload an SRT file for captions > Kaltura can't do this for you
